**ERASE**  
the undesired  
**SIGNS**  
**OF AGING?**

Collagen and elastin are the protein building block of our skin, keeping our skin tight and plump. Loss of collagen and elastin is something we all eventually face.

A unique *Quanta Skin App*, available only on the Chrome Lase Station, **Define** is dedicated to help shape your face by **reducing wrinkles** and **restoring tone to plump and tighten skin**.

REMODEL SKIN  
FROM WITHIN

Chrome  
LASE-STATION

## WHO

is it right for?

**Define** is recommended for anyone with significant signs of facial **aging**, especially **fine lines and wrinkles**. This skin remodeling plan imparts a more youthful tone.

## HOW

does it work?

**Define** takes advantage of laser skin resurfacing to remodel the old collagen and elastin fibers into their **younger configuration**. The use of a laser light makes Define a **non-invasive alternative** to surgical or injectible solutions. Skin will appear **more toned, improving firmness and texture** by reducing fine lines and wrinkles.

SKIN RESURFACING

FOLD

## WHAT

to expect?

Avoid sun exposure or tanning for two months prior to treatment

Sessions on average last 20 to 45 minutes

Your provider may use skin cooling numbing cream for added comfort

Temporary redness, swelling and dryness may occur

Cold compresses can be used for a few days after treatment. Wear SPF 50+ for at least 1 month

Can see results in 1 to 4 treatments with final results seen a few months after the last session

FOLD

## WHY

should I try it?

- Smooth wrinkles
- Improve skin tone and texture
- Develop healthier looking skin
